A 12.5% increase in these hard economic times is asking too much. This would place a burden on low income and middle income families. We can't do without our electricity, so we are forced to pay what you ask us to, but this amount at this time in our tough economy is just too much. My two kids are both public workers who have not had a raise in five years. Others are far more worse off, and coming up with another 12% is something many will struggle to do. I request you decrease the amount being requested. All of us have learned to live within our means in this economy and that should include public utilities. Thank you.
